Dear Hiring Manager,

I am writing to express my strong interest in a Software Engineer position within your organization. As a recent graduate from California State University, Long Beach, with a Bachelor of Science in Computer Science, I bring a solid foundation in software development, a proven ability to adapt to new technologies, and a strong desire to contribute to innovative, real-world projects. My educational background and hands-on experience have equipped me with both the technical and collaborative skills necessary to thrive in a professional development environment.

Over the course of my academic and project-based experiences, I have built full-stack applications using JavaScript, React, Node.js, Express, and PostgreSQL, and I have also worked with tools like Git, Docker, and cloud platforms such as AWS. During my time at DigiClips Inc., I contributed to the optimization of backend systems, helping to reduce latency and improve performance by streamlining data retrieval processes. I also collaborated with cross-functional teams to enhance the user interface and improve accessibility features, experiences that helped refine my communication and teamwork abilities.

Beyond internships and coursework, I've independently taken on projects where I built and maintained websites, developed automation scripts, and integrated APIs. I also led technical workshops and served as a webmaster and graphic designer for a student organization, which gave me insight into real-world stakeholder needs, UX best practices, and how to translate user requirements into functional software. These efforts reinforced my commitment to writing clean, maintainable code and designing systems that are both effective and user-friendly.

In addition to my technical qualifications, I hold numerous LinkedIn Learning certifications in cloud computing, cybersecurity, DevOps, and modern software frameworks, demonstrating my commitment to continuous learning and staying up to date with industry trends. I'm particularly drawn to roles that offer a balance of autonomy and collaboration, where I can contribute meaningfully to the development cycle while also growing alongside talented engineers and mentors.

I am confident that my well-rounded technical skill set, strong work ethic, and enthusiasm for software development make me a valuable candidate for your team. I am excited about the opportunity to contribute to high-impact projects and deliver solutions that improve performance, scalability, and user experience. I would greatly appreciate the chance to speak with you further about how I can support your engineering efforts and bring value from day one.

Thank you for taking the time to review my application. I look forward to the opportunity to connect and further discuss how my background aligns with your organization's needs.

Kindest Regards,

Miles Shinmachi
